Independent tasks will include: plant tissue sampling, water stress monitoring, crop estimation, pest and disease monitoring including virus identification, etc. Employee will also assist managers in monitoring and evaluating general viticulture practices such as pruning, fruit thinning, irrigation scheduling, pesticide and fertilizer applications, harvest planning, etc.

### Responsibilities

- Collection and organization all viticultural data for the season.
- Assist management team with day to day tasks including working with the crew, sourcing supplies and materials, irrigation monitoring, etc
- Supporting sustainability and compliance programs.

### Minimum Qualifications

- Strong written/verbal communication skills in English
- Ability to work independently.
- Ability to lift up to 50lbs
- Works outdoors in warm and cold climates
- Computer skills including Excel
- Valid driver's license and able to drive a car and ATV/UTV

### Preferred Qualifications

- Spanish language skills
- Education in Viticulture or related Ag Field.
- Previous experience in vineyard or winery work
- Experience with organic and/or sustainability certifications
- Knowledge of vineyard equipment operation and maintenance

### Location

Jacksonville, Oregon

### Job Type
